- Michelle Robins
- Victoria Stevenson
- Paul Zimmet

The logo symbolises Aboriginal markings of wandering trails and camps. Traditionally, Aboriginals drew finger lines in the sand to represent travel and used concentric circles to mark resting points where communities gathered around camp fires, meeting to share conversation and companionship. The Melbourne congress logo represents the continuity of the global diabetes community gathering in a world congress. The lines extending beyond the circles demonstrating the continued commitment to advance diabetes care, prevention and a cure worldwide.
