NO ONE SHOULD BE LEFT BEHIND
Act now to support people with diabetes in humanitarian settings and achieve the 2030 Agenda for Sustainable Development

WHAT NEEDS TO BE DONE

IMPROVE ACCESS TO CARE AND MEDICINES
Include diabetes care as a key component of all humanitarian responses

STRENGTHEN HEALTH SYSTEMS
Generate funding to guarantee uninterrupted access to diabetes medicines and care in areas with a high burden of displaced populations

GENERATE DATA
Conduct screening and monitoring programmes to assess the exact burden of diabetes among long displaced populations and the effectiveness of current diabetes care and medicine provision

Humanitarian emergencies put people with diabetes at immediate and long-term risk of life-threatening and potentially fatal complications

1 in 3 people with diabetes have diabetic retinopathy
The risk of cardiovascular disease is 2 to 3 times higher in people with diabetes
1 in 2 people with diabetes are undiagnosed
Every 30 seconds a lower limb or part of a lower limb is lost to diabetes somewhere in the world
